

Everyone deserves to play and be part of their community.

Direct Support for Families with a disability to attend playgroup

FAMILY SUPPORT

PlayTogether provides free direct one-on-one support for all children, families and carers living with a disability, developmental delay or medical concern to join, participate and feel welcomed in a community playgroup.

A dedicated staff member will assist families to locate a welcoming and supportive playgroup, and attend together during the first few visits and provide further support.

PLAYGROUP SUPPORT

Assistance for playgroups to welcome all families and children with disability, through the provision of training and supplying relevant resources, communication aids and information to assist all playgroup families to understand and accept differences within their community.

On going support is available to ensure that families and children gain the maximum benefit from attending playgroup.

For further information or to register, scan the QR codes.
